# Ecozi Wind Farm Services

## Control Building Water Services

**Ecozi provides maintenance and repair services for water and wastewater systems at onshore wind farms.**

Starting with its first site in 2009, Ecozi now provides services at over 100 UK wind farms every year.

Working with leading operators with portfolios of up to 40 wind farms, and attending sites throughout the UK, Ecozi provides operators with options for fixed price, multi-site and fixed term contracts. Ecozi uses its own highly trained engineers - no sub-contractors - to ensure reliable, high-quality services which has led to trusted status with many operators (references available).

Ecozi is experienced in all regulatory areas for both water and wastewater services at wind farms. Single contractor status gives Ecozi the advantage of taking responsibility for the whole portfolio of services, ensuring all welfare facilities operate safely and efficiently.

## Annual Maintenance Services

Ecozi provides maintenance and repair services for sites with rainwater harvesting, mains water or bore hole water supplies.

As well as pump and filter maintenance, Ecozi takes ownership for all water related services, to include guttering, leaks and wastewater treatment plants. This has the advantage of reducing the number of contractors required at site and limiting the need for return visits.

- ✓ Pumps and controls
- ✓ Filters - particle & process
- ✓ UV treatment
- ✓ Water heaters
- ✓ Guttering
- ✓ Tank cleaning
- ✓ Cess tank alarms
- ✓ Septic tank sludge checking\*
- ✓ Packaged treatment plants
- ✓ Legionella sampling

- ✓ Bacteria/mineral sampling
- ✓ Compliance checks for private water supply regulations
- ✓ Environment agency compliance for wastewater
- ✓ Main's water fed sites, testing and compliance
- ✓ Legionella risk assessments
- ✓ Full photographic reporting for each visit

water services maintenance

# Site Repair and Breakdown Services

Ecozi guarantees permanent repairs to any equipment breakdown in one visit.\*\*

Urgent attendance for total system failure may include pump or controller replacement or blocked drains. Non-urgent repairs such as water heaters, alarms or tank cleaning can be done at time of annual maintenance or when attending other sites nearby to minimise costs.

Pump replacement

Controller replacement

Leaking pipe repair

UV and filter repairs

Blocked drain jetting

Treatment plant air blower replacement

Sump pump replacement

\*\*after initial visit to record installed site services.

# Small Works Projects

Ecozi started out supplying rainwater harvesting systems to new build wind farms and have the in-house skills to upgrade, replace or install new systems at existing sites.

As a single contractor the team has acquired the experience and expertise to offer extended services including small one-off projects.

Replacement rainwater tanks

Improved filtration

Kitchen installation

Drinking water systems upgrade

Water heater replacement

Water meter installation

Sump pump installation
